UCAN®

Applications

- **Offices** and factories where much heat is generated.
Suitable for dust and static protection.
- **Factories** of printing, textile, packaging, woodwork and film, etc. It is also useful for spot humidifying.
- **Food processing** for cheese, brewery, distilled liquor and drying process of noodles, etc.
- **Horticultural spray** for orchid, flowers and ornamental plant.
- **Artificial cultivation** for various mushrooms.

UCAN Technology - Power of UV lamp

Sterilizes the water without harming the human body.

The germicidal ray kills various kinds of bacteria and viruses by directly affecting DNA and RNA and sterilizes the water in the reservoir. Since no chemical substance is used in sterilization, the mist has no effect on the human body.

Specification

Model	FT-M20UV
Capacity(L/h)	1.0
Power supply	1φ2W AC230V*
power consumption (VA)	86
No. of oscillators(pcs)	2
Air volume (m ³ /min) 50/60Hz	1.05/1.25
Operating weight(kg)	32
Water tank capacity	13L × 1

*Other power supply types are available on request.

Standard Dimension(mm)
